## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of claims 1-3 and 9 in the reply filed on 1/11/08 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 4-8 and 10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
4. Claims 1-3 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 01/60590 in view of Radtke (4,640,854).
5. Radtke (4,640,854) WO 01/60590 discloses a process of forming a flooring sheet in which granite, quartz and/or sand is crushed, mixed with resin binder, poured in a mold, compressed, hardened, smoothed, cut to size, and chamfered. See page 2, line 21 through page 3, line 14. Mixture may also include metal, glass, ceramic, wood or precious stones. See page 3, lines 15-20. The reference lacks placing a metal plate in the mold before pouring the mixture. Radtke discloses forming a flooring panel by

placing a hardenable filler in a metal pan compacting with vibration and hardening. The metal pan can be deep-drawn (pressed) using sheet steel. It would have been obvious to one of ordinary skill in the art to place a metal pan in the mold of WO 01/60590 because Radtke shows that by doing such one is able to make a strong, light-weight flooring sheet.
